409.1 INTENT: This Section is intended to permit the creation of Planned Development Districts as subdivisions or plats. This District is a zoning change within Article 10 and has been established for the purpose of conserving land through more efficient allocation of private lots, single and multi-family dwelling units, common grounds, greater efficiency in providing public utility services, and securing benefits from new techniques in community development. Such regulations need not be uniform, but may vary in order to promote the public health, safety, morals, welfare and environment for the promotion of public comfort and/or prosperity and/or convenience.

409.2 TYPES OF PLANNED DEVELOPMENT DISTRICTS

PUD for R-1 Zoning; PUD for R-2 Zoning; PUD for R-3 Zoning

409.3 CRITERIA FOR PLANNED DEVELOPMENT APPROVAL: The Township Trustees shall not approve an application for a Planned Development District unless it shall, in each specific case, make specific findings of fact directly based upon the particular evidence presented to it, which support conclusions that:

b. The site will be accessible from public roads that are adequate per Greene County Engineer to carry traffic that will be imposed upon them by the proposed development and the streets and driveways on the site of the proposed development will be adequate to serve the residents or occupants of the proposed development. The Planned Development Applicant(s) shall perform an independent (not affiliated with the Developer/Owner of the property) assessment/study verifying the site plan provides safe ingress and egress with the surrounding area and roads. The results of the analysis and supporting data shall be provided with the initial application and maintained through approval of the final Development Plan. The results shall be reviewed by the Greene County Engineer, and approved by the Bath Township Zoning Commission.

BATH TOWNSHIP ZONING RESOLUTION

SECTION 420 WPO WELL FIELD PROTECTION OVERLAY DISTRICT

420.1 Intent and Purpose: The intent of the Well Field Protection Overlay District is to safeguard the public health, safety and general welfare by protecting the community water supplies within Bath Township through the regulation of potentially polluting land uses and Regulated Substances (Regulated Substances are chemicals and mixtures of chemicals which are health hazards in groundwater. Materials packaged for personal or household use are not Regulated Substances.)

a. The provisions of this Section shall be applicable to community water supply systems within the Township that have currently maintained and scientifically delineated protection areas endorsed by the Ohio EPA and those community water supply systems in which the purveyor has requested this Overlay District be applied for their system. The Well Field Protection Overlay District shall include all lands located within the community water supply system's "one-year capture area" as defined by the Ohio EPA. The provisions of the Well Field Protection Overlay District shall be supplemental to the regulations of the underlying Zoning District. Where the requirements of this Section are in conflict with the regulations of the underlying District, the more restrictive regulations shall apply.

b. The Well Field Protection Overlay District will be implemented in conjunction with the purveyors of the community water systems. The Township may require technical or financial assistance to fully implement portions of this Overlay District and the purveyors will be required to provide this assistance for their systems. The Township Trustees and/or the Township Enforcement Officer will in all cases be the deciding authority in decisions regarding the Well Field Protection Overlay District.

420.2 Implementation: Successful implementation of the Well Field Overlay District will require property owners and those persons responsible for the storage, use, handling, or production of Regulated Substances to provide inventory and use information on Regulated Substances and evidence and/or documentation of applicable best management practices (BMP's) being utilized to manage the substances to the Township.

a. Upon application for a Zoning Certificate, appeal of a Zoning Certificate, or conditional use for properties within this Overlay District, the Bath Township Trustees may employ such technical expertise as needed to ensure compliance with the provisions of these regulations. All reasonable costs, with prior notice to applicant, incurred in the compliance review process shall be passed through to

BATH TOWNSHIP ZONING RESOLUTION

the applicant and shall be in addition to those fees normally charged to review the application for a Zoning Certificate.

b. An Application for a Use Compliance Permit will capture information necessary to comply with the intent of this Overlay District. Any change in use or re-zoning of an existing structure for commercial use, or construction of a new structure for commercial use shall require completion of an Application for a Use Compliance Permit.

420.3 Permitted Uses: Within the Well Field Protection Overlay District, the permitted uses are defined in Article 4 of the Bath Township Zoning Resolution and shall be those of the underlying Zoning District, unless prohibited within the Well Field Protection Overlay District

420.4 Conditional Uses: Within Well Field Protection Overlay District, the conditional uses shall be those of the underlying Zoning District in addition to the requirements contained in this Section.

a. Any request for a Zoning Permit or change of zoning on a parcel or parcels within the Well Field Protection Overlay District that will involve Regulated Substances meeting the criteria set forth in Section 420.7, shall be subject to obtaining conditional use approval.

b. In addition to the conditional use procedure requirements set forth in Section 1004 of this Resolution, if a proposed activity/use will involve Regulated Substances meeting the criteria set forth in Section 420.7, the applicant shall provide the Township Zoning Inspector with a written plan that describes the proposed activity, lists the specific regulated substances and quantities involved, analyzes any potential threats posed by the activity to groundwater resources, and provides information on the Best Management Practices that will be utilized to reduce and/or alleviate those threats. This plan shall be used by the Zoning Commission and Board of Zoning Appeals to render a decision on the proposed conditional use.

420.5 Prohibited Uses: Any land use not specifically designated as permitted or conditional uses as provided in Article 4 of this Zoning Resolution shall be prohibited.

420.6 Non-Conforming Uses: A use, property or business in operation at the time this Overlay District was adopted and having an amount of regulated substances exceeding the quantities set forth in Section 420.7a is a non-conforming use and is allowed to remain; however, no change of occupancy (ownership or tenants) or any expansion involving regulated substances, or any modification resulting in an

BATH TOWNSHIP ZONING RESOLUTION

increased amount of regulated substances on the property is permitted without approval in accordance with this Zoning Resolution. A use, property or business must comply with all other sections of this District. If a non-conforming use of any land or structure is voluntarily discontinued for two (2) years or more, any further use shall be in conformity with this Well Field Protection Overlay District.

420.7 Groundwater Protection Standards (Quantity Limits)

a. Quantity Limitation. Use, storage, handling and/or production of Regulated Substances in conjunction with permitted, accessory, and conditional uses in this District shall be limited to aggregate of Regulated Substances. The aggregate of Regulated Substances in use, storage, handling and/or production may not exceed fifty-five (55) gallons or four hundred forty (440) pounds, which ever is less at any time.

b. Limited Exclusions. A limited exclusion from the provisions of Section 420.7a is authorized for the following types of Regulated Substances and quantities for purposes of reporting as outlined in 420.11, however, they are still Regulated Substances and are still subject to spill reporting requirements at outlined in Section 420.9.

(1) Regulated Substances used for the non-routine maintenance and repair of property or equipment. The use, storage, handling and/or production of Regulated Substances under this exclusion shall be limited to:

This limited exclusion also applies to the application of agricultural chemicals to cropland where such chemicals are brought in from other locations. This provision does not exempt such agricultural chemicals either stored on-site or brought in from other locations from the inventory, spill reporting and underground storage tank protection requirements of the Well Field Protection Overlay District.

NOTE: This regulation does not restrict the use of agricultural chemicals applied in accordance with Best Management Practices and/or label directions.

(5) Transportation of regulated substances through the Well Field Protection Overlay District provided that the transporting vehicle is in compliance with applicable federal, state and local laws and regulations, and provided that the regulated substance is fueling the transporting vehicle or the transporting vehicle is in continuous transit, making delivery, or is stopped for a period of time not to exceed twenty-four (24) hours.

(6) Regulated substances that are within containers such as gas tanks, radiators, transmissions, brake lines and other similar containers that are an integral part of an operable motor vehicle or boat and used specifically and solely for the operation of the vehicle in which the substances are contained. Except as provided for in Section 420.7 b(5) the tanker portion of a tractor trailer/vehicle shall not be included in this exclusion.

(7) Regulated substances associated with paving, the pouring of concrete, or construction for which all necessary permits have been obtained, provided such regulated substances are present at the construction site for which the permits have been issued and do not pose a real and present danger of contaminating surface and/or ground water.

BATH TOWNSHIP ZONING RESOLUTION

The containment system shall be designed to capture one hundred and ten (110) percent of a release from a primary containment unit. Existing containment systems and procedures shall not be removed, nor shall their ability to contain spills be compromised, so long as Regulated Substances are stored, transferred or used within the containment areas. Improvements and/or additions to containment systems may be performed so long as the ability to contain a spill is not compromised. Temporary approved containment systems may be required during maintenance and/or improvement activities.

e. Septic Systems. Greene County Combined Health District (GCCHD) governs residential septic systems. All residential septic systems shall be permitted by the GCCHD and maintained by the
